HEROES OF ANTARES

the first blockchain game that trains AI to save the planet

FREE TO PLAY | F2P   **PAY TO PLAY | P2P**   **PLAY TO EARN | P2E**

Fabula

Antares, our tech-savvy hero, recognizes AI's potential to both build and destroy. Now, she is determined to prevent the world from imminent chaos. To retrain the outdated system, she forges a virtual world, a precise **digital replica of Earth**, and uses it to simulate environmental and natural disasters.

Antares' mission can be completed on her own. So, she assembles a team of heroes, including her childhood friend, from around the globe. Each possesses **unique talents and abilities**. Together, they form an unstoppable force, ready to take on any obstacle that comes their way.

As they navigate the virtual world the tests become increasingly intricate and the stakes soar. With the help of the AI, the heroes are able to anticipate and prevent disasters before they occur. But, **the ultimate challenge still lies ahead.**

In the end, the Heroes of Antares are revered as a legendary team, who have **linked the virtual world to reality**. In turn, they inspire gamers and non-gamers alike to work together and bring about **positive change in the world.**

Key features

AI

The Primary Algorithm

AI observes, learns, and replicates the players' behavior in simulations

DAO

Every Vote Counts

DAO is a special opportunity for players to influence the game's campaigns.

COMPANION

Real Word Implications

This module allows real life companies to create their own brand space and promote and implement ideas for ecological restoration.

## OPEN GAME

Transcends Borders

Accessible to players worldwide, open game enables users to make meaningful contributions to the planet's ecology without needing to own NFTs

VIRTUAL SPACES

Life Happens Here

This is not only a personalized space for avatars but also a shared 'living room' for the entire community to communicate and interact.

Gameplay overview

REPLICATION

Obtain the first two avatars. This allows you to form a team and replicate other avatars with distinct characteristics

SIMULATIONS

Complete simulations to train the AI based on your gameplay. Once you've finished them and gathered data for the AI, a new campaign with fresh simulations will become available for you.

PROGRESS BAR

Monitor the system to gauge how much information the entire gaming community has gathered. This ensures successful AI training in a specific simulation!

LEADERBOARD

This reveals the rating of each hero (player) in the Antares team. The higher you rank on the leaderboard, the more engaging the game becomes, and the greater the reward you'll receive.

RENTAL

Rent an avatar with specific traits needed for a given simulation or offer your own avatar for rent to complete specific tasks.

IN-GAME SHOP

Acquire the essential resources for gameplay and virtual spaces through in-game purchases.

Engaged community

11ML

CRYPTO ENTHUSIASTS

We enable players to invest in their growth and development while also supporting the web3 ecosystem.

24ML

GAMERS

These individuals are given the opportunity to take on challenges in both real and virtual worlds to be a top Hero.

54ML

ECO-WARRIORS

Those eager to make a meaningful contribution towards saving and preserving the planet, can.

Player Motivation

Each system in the gaming world serves a unique purpose to cater to the diverse needs of players

The Grand Vision

FREE TO PLAY | F2P

Play as a conventional avatar or become a heroic contributor all without the need for an NFT.

New Experiences

PAY TO PLAY | P2P

Duplicate the acquired NFT HOA and utilize them for participating in simulations and AI training.

Real Ownership

PLAY TO EARN | P2E

Use the available game mechanics to acquire more resources to sell on secondary marketplaces.

Economic board

The game's functionality is partitioned into autonomous yet closely interconnected parts. By engaging with any one of them, you have the chance to appreciate each one.

To ensure the successful operation of this mechanic, we've incorporated three important components into the economic structure of the game.

AVATAR
GAMING NFT

All avatars used in the game can be replicated, rented out, or sold.

BIT
INTERNAL COIN

This is the most critical currency. It is obtainable and spendable exclusively within the game. Player will acquire it after your initial avatar replication

ATC
TOKEN ERC 1155

This is a tokenized cross-game currency within the atomicgames.io ecosystem. It grants you access to all of our projects and opportunities beyond.

Monetization

MINT
The sale of NFT collections

IN-GAME SHOPPING
The sale of BIT for in-game purchases

SALE
Commission earned from selling NFTs on secondary markets

WEB3 STORE
The sale unique digital and physical goods under the HOA brand

Our path to hype

OPEN SEA

bring the HOA collection closer to potential heroes through a presence on the most renowned marketplace

INFLUENCERS

enlist prominent figures from the crypto gaming sphere to share our project with their followers

SOCIAL MEDIA

foster the HOA community by creating and distributing captivating content about the project

AI MARKETING INTEGRATION

employ real-world elements for expeditious action and imaginative solutions

MEDIA ATTENTION

spotlight the HOA project through coverage in digital publications to garner recognition

PARTNERSHIPS

collaborate with others passionate about safeguarding the planet to promote the initiative and engage those who share the same concerns

Vision plan

Be a hero for the real world

[Stage 1]

- Marketing campaign
- Limited user release
- Mint first NFT collection

[Stage 2]

- Public Game launch
- Open first campaign
- New campaigns development

[Stage 3]

- Ideas for a new NFT collection
- Launch the DAO module
- New campaigns

[Stage 4]

- Rental module release
- Announcement of the new NFT HOA collection
- New campaigns
